

# CloudCath Connect™ PD

## Case Study

“CloudCath is good to have, especially if you don't have access to a nephrologist or clinic where you live and have to travel to see your doctor like I do. **It gives me peace of mind, especially knowing that it works.**”

CloudCath Patient

### Day 0 | CloudCath Notification

Patient's doctor received a text from the CloudCath System. After a prompt from their nephrologist, the patient noticed their fluid was cloudy.

Due to inclement weather, the patient was unable to go to the clinic for labs. The nephrologist prescribed antibiotics from their emergency kit.

### Day 24 | Patient Returns to PD

Patient returns to PD with an increased turbidity due to a suspected dry cavity

### Day 7 | Patient Labs

Patient is able to go to the clinic for their labs.

### Day 14 | Lab Results

Due to the culture results, nephrologist changes patient's antibiotics

### Day 18 | Patient Hospitalized

Patient is hospitalized due to non-peritonitis reasons

### Day 42 | Patient Abx Completed

Patient reports the end of their antibiotic treatment
